

**PROMs**

**CMY VitaLog, a tool developed  
by patients and clinicians together  
for all CLL patients and their healthcare providers**

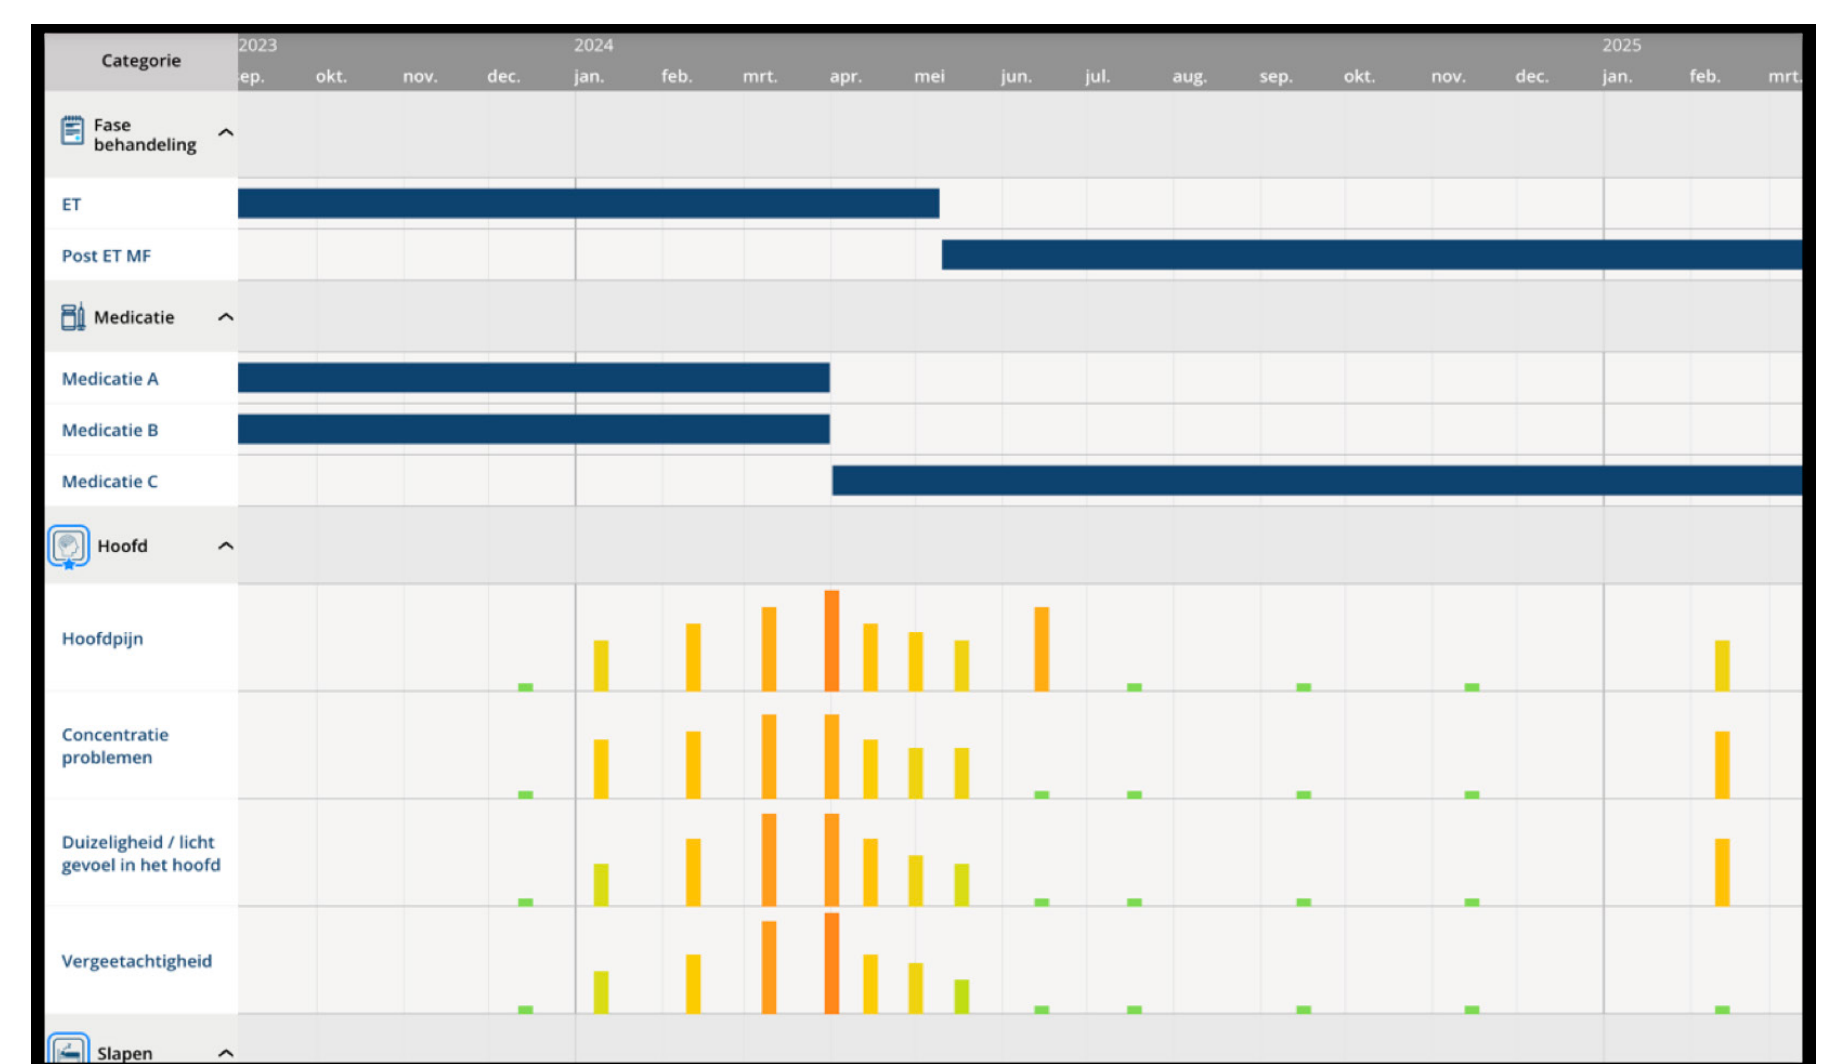

## Empowering patients

- Tracks symptoms over time, disease or treatment related
- Patients in the lead to decide what to report and when
- Better preparation for consultations

## Supporting clinicians

- Provides information to adapt treatment
- Makes more personalized care possible
- Reduces workload, while maintaining quality of care

## Advancing research

- Data generated are based on a validated questionnaire
- Real world evidence available for research
- Can provide insight into possible improvements in care
